Assessing Eye Movement

Objective: To demonstrate the proper assessment of eye movement.

Skill	Max Points	Skill Demo	
Criteria met: Determines the Scene is Safe, Initiates Standard Precautions, Introduces Self & Obtains Permission to treat/help	-		
Ask the patient to stare at your nose or center of your forehead.	1		
Hold up your index finger approximately 6-8 inches away from the patient's face. Instruct the patient to follow the tip of your finger with his/her eyes without moving his/her head.	1		
Slowly move your index finger from the center to the right, then back to center, then over to the left, and then back to the center. The patient's eyes should follow your finger and move in sync with one another.	1		
Next, slowly move your finger from the center upward, then downward past center, and then back up to the center. The patient's eyes should follow your finger and move in sync with one another.	1		
Finally, slowly move your finger toward you a few inches and then toward the patient's nose. The patient's eyes should follow your finger and move in sync with one another.	1		

Must receive 5 out of 5 points.
